Which suggestions do you have to improve future editions of this stage?

11 responses

My receiving institution i.e. UNIMI has taken quite long time (more than one month) to provide me the university credentials which were very much necessary for all beurocratic works or other works as for example filling up of laboratory risk form and field visits. I have gone through some of the difficulties for not receiving the credentials during my first month of training.

Secondly, I strongly feel that the training period should be more than three months since agronomical research are generally time consuming and long.

The stay should be for longer duration may be 6 months.

Although this training has exceeded my expectations, it would be preferable if we had the opportunity to attend a theoretical lecture on the study topic from the host institute.

Maybe to increase the stipend provided to the trainee/student

A SUGGESTION WOULD BE THAT A SPECIFIED WORK BE PLANNED BEFORE A STUDENT IS HOSTED IN THE UNIVERSITY SO THAT THE WORK CAN BE COMPLETED WITHIN THE SPECIFIED PERIOD OF 3 MONTHS OR TO INCREASE THE TIME PERIOD FOR UNDERTAKING A COMPLETE STUDY.

The topic of the research and host department needs to be arrange accordingly before the visit to accommodate the training period in a fruitful way. Also it would be good to increase the amount of financial support provided as cost of living and other expenses are higher in the location of some institutions.

I believe that the funds should have been a little more as the cost of living at the place that I have visited was very high

The stay can be organized for a longer time like 6 months so that enough scientific output can be generated in terms of publication

I hope the time period of the training would be for atleast 5-6 months so that we could get more time to conclude our work assigned to us.

The training period can be increased in future.

Funding amount was not enough
